

RECLAIMED OAK

There's something wonderful about being able to reuse wood that has a history and character all its own. We salvage this priceless lumber from old buildings and barns so that we can repurpose it to tell a new story. At Hardwood Design Company, we carefully and thoroughly inspect all our reclaimed wood to ensure each piece is in good condition. This flooring exudes warmth, boasts a uniqueness in character and is perfect for our clients who think of vintage as a treatment. We are proud to offer these distinctive reclaimed oak floors with the confidence that they are not only beautiful and authentic but durable as well.

- RECLAIMED OAK -

Engineered wood floor specifications:

- 100% Locally Made
- 5/8" total product thickness
- Widths from 4" - 10" (random widths available)
- Lengths up to 10' (avg. > 6')
- Natural millrun grade
- 4.5 mm sawn lumber wear layer
- CARB 2 certified
- 9 ply Baltic Birch substrate
- Precision T&G side profile

Solid wood floor specifications:

- 100% Locally Made
- 3/4" total product thickness
- Precision T&G side profile
- Widths from 4" - 10" wide (random widths available)
- Lengths up to 10' (avg. > 6')

Additional options for both solid and engineered:

- Authentic handscraping / distressing
- Weathering
- Creative edge treatments
- Hand oiling & custom finishing
- Custom coloring with stains, oils, or waxes

Because Hardwood Design Company approaches the finishing from an artisan perspective, many variables come into configuration; therefore, pricing will vary correspondingly.

Pricing subject to change, please call for current pricing.
